BETA TESTING

Test Report 1

Tester: Sri Charan Vemuri

Tester Feedback

1. **Register as a User Page:** Tested user registration page by submitting blank form, leaving blank fields where fields were marked as required, and registered a user with duplicate username. Form validations were provided when and where required.
2. **Register as Association:** Similar tests as user page were done. Validations were provided where expected and informative messages were displayed.
3. **Login Page:** alerts and prompts were displayed when incorrect credentials were entered, and appropriate message was shown when logged in with blank fields**.**
4. **User Screens:**
   a. **Profile Page:** User's personal data such as username, first name, email was displayed. profile page did not display user's last name.
   b. **Home Page:** Home page shows a list of event(s) (upcoming) offered by the Association(s) the user follows. Initially the page displays nothing as expected and later displays followed Association's upcoming events if the user follows any Associations. Upcoming event(s) linked to an association were removed from home page when an Association is unfollowed.
   c. **Upcoming Events:** Upcoming events for the user. Any event followed by the user appears in this page. There is an option to unfollow the event and unfollowing an event removes it from this list.
   d. **Past Events:** Events followed by the user with a date-time stamp less than the current date-time appear here.
   e. **My Associations:** Associations followed by the user appear here and followed associations can be unfollowed. If no association is followed, then the list is empty. Tested by following and unfollowing associations.
   f. **Explore Associations:** A list of all the associations appear here and associations not followed can be followed.
   g. **Explore Events:** A list of all events that can followed by user appear here, tested by following a few events. Followed events appear in Upcoming events.
5. **Association Screens:**
   a. **Profile Page:** Association's personal data such as username, description was displayed.
   b. **Upcoming events Page:** A list of upcoming events and the details about the events was displayed in a clear and easy to read format. Only upcoming events (events organized for a future date) were provided as expected and an empty list was provided if the association had no upcoming events.
   c. **Past events Page:** A list of past events and their details were provided as expected if the association organized any events in the past and empty list was provided otherwise.

d. Create an Event Page: Required fields cannot be submitted with empty fields. New events are updated in Upcoming events. Can also create past events which should not be possible.

Suggestions: Registered associations should be approved or declined by Admin before they can access their profile and organize events. Currently, status of an account cannot be viewed. A provision to view the status can provide better understanding of the application.
